

Standard Guide Bush

Max Land Guide Bushing

### **Guide Bush with Extended Carbide Insert ( Max Land Guide Bushing )**

- Guiding surface length up to 70mm
- Bore Diameter from 4mm to 42mm
- Guiding surface length will vary depending on bore diameter and guide bush model
- Suitable for components which require long drawing back like chasing a long thread
- High concentricity
- Extended carbide insert ensures improved guidance of component
- Prevents slippage of component from the carbide guide
